

WHAT TO DO? SENSING A TSUNAMI

Tsunamis can be detected using our human senses.
Recognize a tsunami's natural warning signs.

FEEL

- Strong local earthquakes may cause tsunamis.
- **FEEL** the ground shaking severely?

SEE

- As a tsunami approaches shorelines, water may recede from the coast, exposing the ocean floor, reefs, and fishes.
- **SEE** an unusual disappearance of water?

HEAR

- Abnormal ocean activity, a wall of water, and approaching tsunami create a loud "roaring" sound similar to that of a train or jet aircraft.
- **HEAR** the roar?

RUN

- Don't wait for official evacuation orders.
- Immediately leave low-lying coastal areas.
- Move inland to higher ground.
- **RUN** if you see a tsunami coming!
